

Rotor Improvement Update- ACDelco Professional Brake Rotor

ACDelco Professional Brake Rotor have an improved coating design for currently 28 part numbers prior to part number 18A2814 and all part numbers numerically higher than 18A2814 except for drilled/performance rotors. The improvement is moving from a black corrosion resistant coated hat and vane to a fully coated rotor using Cool Shield™.

Cool Shield™ Fully Coated Rotor Have Edges and Vanes That Stay Cleaner For Optimal Cooling

- Tested to Salt Spray Regulation ASTM- B117
- Long Lasting COOL SHIELD™ Protective Coating For Severe Operating Conditions

Installation

- Can be installed out of box doesn't contain oils, no need to remove coating
- Install on vehicle same as uncoated rotor performing routine test drive confirming after test drive coating has been removed from brake pad contact surface area on rotor when completed
