739 Series Diesel Pumps

Ford High Pressure Oil Pumps (HPOP)

The High Pressure Oil Pump supplies the high pressure oil needed to activate the Hydraulically actuated Electronically controlled Unit Injector (HEUI) used on the Ford 7.3L and 6.0L Power Stroke engines. Four part numbers cover the entire line of 7.3L Power Stroke engines from 1994-2003. Two additional part numbers cover the 2003-10 6.0L Power Stroke.

Dodge 5.9L and 6.7L Cummins Fuel Injection Pumps

Early Dodge applications from 1998.5-2002 utilize an electronically controlled Bosch VP44 injection pump and are covered by three part numbers. Also offered is the Bosch CP3 pump used on the 2003-07 Cummins 5.9L and 2007-11 Cummins 6.7L engines.

GM 6.5L and 6.6L Duramax Fuel Injection Pumps

Early GM 6.5L engines from 1994-2002 utilize an electronically controlled Stanadyne DS injection pump and are covered by two part numbers. The later 6.6L Duramax utilizes a Bosch CP3 pump and common rail injection, coverage is provided from 2001 through 2010.
